

in brief: Teneso Europe

Initial situation:

With effect from 1st January 2010, tetraxx will be a member of Teneso Europe SE, a network of market leaders specialising in transportation and logistic services for high-sensitivity, high-value products manufactured by companies in the hi-tech sector.

The customers: reputable, international companies operating in the areas of medical technology, telecommunications, IT, related hi-tech industries and banking.

The challenge: Teneso Europe SE offers excellent added-value logistics in combination with technical services and makes these available on a Europe-wide basis. The principle of One company: One quality standard guarantees a high level of transparency and flexibility for the customer.

Teneso all-round service

- » Hi-tech logistic solutions within Europe provided by a single continent-wide organisation with a unified IT network, structured pricing policy and simplified communications for customers via a single contact point.
- » Technical logistics from factory to end customer.
 - Transport:** A fleet of around 700 fully equipped vehicles ensures safe transport for all manner of goods.
 - Storage:** Within its member countries, Teneso Europe SE has at its disposal 70 high-security warehouses that have been specially designed to protect highly sensitive appliances.
 - Delivery:** The latest in unloading and lifting technology is used to ensure that goods are delivered without damage.
 - Installation:** Teneso Europe SE is tasked with the assembly of electronic equipment, including cash machines, computers, medical equipment, office technology and automatic dispensers.
 - Integrated logistics:** Special facilities can be made available when added-value services are called for, e.g. functional testing, software updates and upgrades, quality control, packaging and unpacking, labelling, completion of documents, waste disposal.
 - Disposal logistics:** Teneso Europe SE is knowledgeable and skilled in the correct disposal of waste, offering customers a complete logistic service for getting rid of old electrical and electronic appliances.
- » Members share their in-depth understanding of the industry based on excellent local knowledge and networking within the individual countries to achieve economies of scale and maximise efficiency.

Benefits for you:

As a hi-tech company operating throughout Europe, you no longer have to deal with a multiplicity of service providers. Instead, you can rely on a well-oiled logistic network with a fleet of more than 700 vehicles, 70 high-security warehouses and skilled operatives. You will benefit from the experience and expertise of the individual Teneso partners right through from placing your order to its successful fulfilment.
